## WHOLESALE PRICE LIST for 1942-1943

---

### TERMS OF SALE

(Please read carefully when ordering)

**PRICES**—5 and 50 of the same variety and size at 10 and 100 rates respectively. For larger quantity than listed inquire. When the price of a single plant is not listed under "Each" add 25% to the 10 rate. All quotations are for immediate acceptance subject to prior sale.

**DISCOUNT** of 3% offered for orders with cash. Attractive discounts for B&B stock in truck or carload lots.

**ADDITIONAL CHARGES** to the listed prices will be made when the customer marks or selects plants in the nursery.

**TERMS OF PAYMENT.** Cash with order for immediate shipment. Booking orders will be accepted when accompanied by remittance covering 25% of the purchase amounts. C. O. D. orders accepted with a deposit of 25%.

**SUBSTITUTIONS.** In case you do not desire substitution with the nearest sort, color or size please state clearly on your order "No Substitution."

**PACKING CHARGES.** Free packing for cash orders. At cost in other cases.

**TRANSPORTATION.** Please state whether order is to be shipped by parcel post, express, rail or motor

freight. When no instructions are given we will use our judgment.

For parcel post shipments be sure to remit amount sufficient to cover postage; otherwise instructions are void.

Our responsibility ceases upon delivery to forwarding companies; claims for damages in transit should be made upon the latter.

**LIABILITY.** We are not liable for injury to stock from any cause beyond our control. Unless we make the plantings and are remunerated for it, we give no guarantee that the stock will live and grow.

**CLAIMS.** If, by any possibility, an error has been made please notify us immediately. We will be pleased to promptly rectify the mistake.

**REMARKS.** Lining out stock is listed here in light face type.

(C) indicates "from cutting," (S) seedling, (G) grafting. (T) indicates once transplanted, (TT) twice transplanted, etc. All lining out stock is in bare roots unless otherwise indicated.

Specimen stock is listed in bold face type; B&B means balled and burlapped.

**NOTICE.** This price list cancels all previous quotations and are subject to change without notice.

Federal or state taxes levied upon sales may be added to the prices herewith quoted.

## CONIFERS

### CEDRUS DEODARA

We have only a very limited supply.

	Each	10	100
2-3 feet, field grown, B&B	1.50		
3-4 feet, field grown, B&B	2.00		
4-5 feet, field grown, B&B	3.00		

We have large specimens up to 10 feet in height. Prices made upon application.

### CRYPTOMERIA JAPONICA VAR YOSHINO

We are the only nursery offering this valuable variety. It grows into a very symmetrical pyramidal

shape and it is very compact with fine foliage. This variety is much superior to the ordinary *Cryptomeria*. Although it prefers a heavy moist soil, it will do well in any type of soil.

	Each	10	100
6-8 inch, C. T. ....	1.25	10.00	
8-12 inch, C. TT. ....	1.50	12.00	

## CUNNINGHAMIA LANCEOLATA

(Chinese Fir)

6-8 inch, C. T. ....	1.00	8.00
8-12 inch, C. TT. ....	1.25	10.00
3-4 feet, field grown, B&B....	1.50	
4-5 feet, field grown, B&B....	2.50	
5-6 feet, field grown, B&B....	4.00	

## CUNNINGHAMIA LANCEOLATA GLAUCA

(Blue Chinese Fir)

The character and general appearance of this variety is much the same as the above variety, but the *Lanceolata Glauca* has a more dense and glaucous foliage. This plant will soon take its deserved place in the Southern landscape. We have only a limited supply.

6-8 inch, C. T. ....	1.25	10.00
8-12 inch, C. TT. ....	1.50	12.00
12-18 inch, C. TT. ....	1.75	15.00
3-4 feet, field grown, B&B....	2.50	
4-5 feet, field grown, B&B....	3.50	
5-6 feet, field grown, B&B....	4.50	

## JUNIPERUS CHINENSIS ALBO-VARIEGATA

(Variegated Dwarf Chinese Juniper)

2-4 inch, C. T. ....	1.00	8.00
4-6 inch, C. T. ....	1.25	10.00
6-8 inch, C. T. ....	1.50	12.00
2-3 feet, field grown, B&B	2.00	
3-4 feet, field grown, B&B	3.00	

## JUNIPERUS CHINENSIS DENSA GLAUCA

Similar to *Albo-variegata* but has solid silvery-blue foliage. This a very compact grower with a very regular pyramidal shape. It is considered by many as being one of the best of the *Junipers*.

4-6 inch, C. T. ....	1.25	10.00
6-8 inch, C. T. ....	1.50	12.00
8-12 inch, C. TT. ....	2.00	15.00
2-3 feet, field grown, B&B	2.00	
3-4 feet, field grown, B&B	3.00	

## **JUNIPERUS CHINENSIS FEMINA**

(*Juniperus Japonica Sylvestris*)

	Each	10	100
4-6 inch, C. T.....	1.00	8.00	
6-8 inch C. T. ....	1.25	10.00	
8-12 inch, C. TT.....	1.50	12.00	
3-4 feet, field grown, B&B	2.00		
4-5 feet, field grown, B&B	3.00		
5-6 feet, field grown, B&B	5.00		

## **JUNIPERUS CHINENSIS MASCULA**

4-6 inch, C. T.....	1.25	10.00
---------------------	------	-------

## **JUNIPERUS CHINENSIS PFITZERIANA**

4-6 inch, C. T. ....	.90	7.50
6-8 inch, C. T. ....	1.10	9.00
8-12 inch, C. T. ....	1.50	12.00
12-15 inch, C. TT.....	2.00	15.00
24-30 inch spread, field grown, B&B .....	1.50	
30-36 inch spread, field grown, B&B .....	2.25	
3-4 feet spread, field grown, B&B .....	3.50	

## **JUNIPERUS CHINENSIS PROCUMBENS** (Trailing Juniper)

2-4 inch, C. T. ....	1.00	8.00
4-6 inch, C. T. ....	1.25	10.00
18-24 inch spread, field grown, B&B .....	1.25	
24-30 inch spread, field grown, B&B .....	2.00	

## **JUNIPERUS CHINENSIS SARGENTI**

This is one of the best creeping junipers.

4-6 inch, C. T. ....	1.25	10.00
6-8 inch, C. T. ....	1.50	12.00

## **JUNIPERUS COMMUNIS COLUMNALIS** **STRICTA**

(Columnar English Juniper)

Our strain is very narrow columnar. It is similar in appearance to Royal Italian Cypress. It is a very

compact grower bearing silvery-green foliage. A good substitute for Irish Juniper.

	Each	10	100
4-6 inch, C. T.....		1.00	7.00
6-8 inch, C. T.....		1.25	9.00
5-6 feet, field grown, B&B	3.00		
6-7 feet, field grown, B&B	5.00		

## **JUNIPERUS COMMUNIS DEPRESSA**

(Canadian Juniper)

## **JUNIPERUS COMMUNIS DEPRESSA AUREA**

(Golden Canadian Juniper)

## **JUNIPERUS COMMUNIS DEPRESSA PLUMOSA**

(Andorra Juniper)

Price on above three Junipers:

4-6 inch, C. T.....	1.00	7.00
6-8 inch, C. T.....	1.25	9.00

## **JUNIPERUS CONFERTA**

(Shore Juniper)

This has proven to be one of the best ground covers because of its rapid growth and its adaptability to almost any type of soil. The foliage is pea-green and will not turn brown in the winter.

6-8 inch, C. T.....	1.00	7.00
8-12 inch, C. T.....	1.25	9.00
12-18 inch, C. TT.....	1.50	12.00

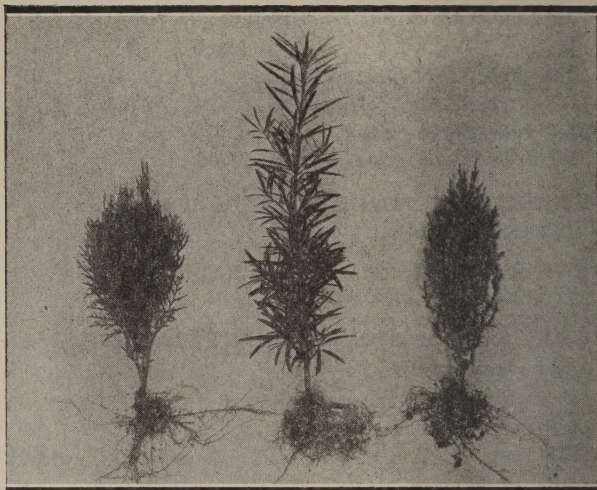

## **JUNIPERUS EXCELSA STRICTA**

(Greek Juniper)

4-6 inch, C. T. ....	1.00	8.00
6-8 inch, C. T. ....	1.25	10.00
18-24 inch, field grown, B&B.....	1.00	
24-30 inch, field grown, B&B.....	1.50	

## **JUNIPERUS VIRGINIA CANNATI**

2-3 feet, field grown, B&B....	1.50
3-4 feet, field grown, B&B....	2.25
4-5 feet, field grown, B&B....	3.50

Left to right: Arborvitae 6-8, Japan Yew (Podocarpus) 8-12"  
Juniper 6-8"

## PODOCARPUS SINENSIS

(Japan Yew)

## PODOCARPUS SINENSIS MACROPHYLLA

(Large Leaved Japan Yew)

Prices on above varieties of Yew.

	Each	10	100
4-6 inch, C. T.....		.75	6.00
6-8 inch, C. T.....		1.00	8.00
8-12 inch, C. TT.....		1.25	10.00
12-15 inch, C. TT.....		1.75	15.00
2-3 feet, field grown B&B	1.25		
3-4 feet, field grown, B&B	2.00

3-4 feet, field grown, sheared,		
B&B .....	.75	

### ABELIA EDWARD GOUCHER

This is a new introduction of the U. S. Department of Agriculture. It bears bright lavender-pink flowers. We have tried this variety in our nursery, and have found it thrives very satisfactory down South as well as in the North. We believe this is one of the best novelties on account of its beautiful habit of growth and profusion of bloom.

We can supply only small lining out sizes.

	Each	10	100
4-6 inch C. T. ....		1.00	8.00
6-8 inch C. T. ....		1.25	10.00

### ARDISIA CRENULATA

2¼ inch pot .....	1.25	10.00
3 inch pot .....	1.50	12.00

### ARDISIA JAPONICA

This is one of the best evergreen ground-cover plants. Its thick leathery foliage and many running branches closely resembles the Trailing Arbutus (*Epigaea repens*). It bears very attractive red berries in the winter. This plant thrives very well in the South and is well adapted to shade and light, well-drained soil.

6-8 inch, S. TT. ....	.15	1.00	8.00
8-12 inch, S. TT. ....	.20	1.50	12.00

### AUCUBA JAPONICA

18-24 inch, B&B.....	.75
24-30 inch, B&B.....	1.00

Partial View of Azalea Lath House

## AZALEAS

A few cultural suggestions:

1. Azaleas thrive in acid soil. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case the Azaleas are to be planted in such a soil, remove original soil and use plenty of leaf mold or peat moss mixed with the other soil which should contain no alkali; or if alkaline apply Aluminum Sulphate at the rate of one 4 inch pot full to a wheelbarrow of soil.

3. As the azalea root system is very shallow, it dries fast. Apply sufficient water to keep roots moist always.

4. Azaleas delight in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be made where all surplus water will run off quickly.

5. Azaleas thrive best in partial shade (when the bush grows larger it will stand the full sunlight) but many good blossoms cannot be expected if the bushes are planted under complete shade.

6. The Azalea is not a gross feeder. If plenty of leaf mold or like organic matter is applied, it does not require any commercial fertilizer. On the contrary, very often a heavy application of fertilizer injures the root system. However, if necessary a light application of well rotted cow manure, sheep manure or commercial fertilizers such as Vigoro is beneficial.

7. Red Spider and Thrips sometimes trouble the plants. Frequent spraying of the plants with plain water will usually keep this trouble away. If this does not work, spray or dust the plant with a sulphur mixture.

## AZALEA INDICA

### PINK AND ROSE RED FLOWERS

**CROEMINA**—Shell pink, large flower, earliest bloomer and very rapid grower, but not compact.

**MAXWELL**—Carmine red, mid-season, very hardy.

**PERFECTION**—Rose pink, large flower, mid-season.

**PRIDE OF MOBILE**—Lovely watermelon pink. Flower very large, mid-season; large leaves, very vigorous grower. One of the best Indica Azaleas.

## **ORANGE RED**

**COCCINEA MAJOR**—Brilliant scarlet, late season, small leaves.

**PRESIDENT CLAY**—Orange-red with purple spot at the throat. Blooms early.

**PRINCE OF ORANGE**—Flower large, dark orange red. One of the richest colors of all Azaleas blooming late. Leaves medium, dark shiny green. Rather low headed with compact growth.

## **SALMON**

**DAPHNE SALMON**—Medium flower with light salmon, early.

**DUC DE ROHAN**—Medium sized flower of lovely salmon pink, blooms early, leaves small, shiny green, compact.

**MOSS POINT LATE SALMON**—Pretty salmon color, very large flower with widely waved petals. Very late, hardy, vigorous grower.

**WILLIAM BULL**—Double flower of mud red color, late, exceedingly vigorous and upright grower.

## **LAVENDER-LILAC**

**FORMOSA**—Large lavender flower, mid-season, large leaves; most vigorous grower.

**GULF PRIDE**—A sport of Indica Alba (*Ledifolia Alba*). Flower medium to large, straight petals of most charming light purple color never seen in other varieties with four of five large flowers clustered like *Rhododendron*. It blooms at mid-season. Leaves broad and thick, dull green covered with hairy secretion. Rather upright and open grower unless well pinched back. Very hardy and stands cold better than any other Indica variety.

## **MURASAKI-BOTAN (Purple Peony)**

Belong to the *Ledifolia* family. Flowers are made up of 15 to 20 long but narrow petals of light purple color, 2 to 3 inches in diameter. In appearance they very much resemble asters, despite the fact that they are Azalea blossoms. It blooms in March. Leaves are narrow and yellowish dull green with hairy segments. Fast grower and very hardy.

## WHITE

**FIELDERS WHITE**—Early, large pure white flower. Strong upright grower.

**INDICA ALBA**—(*Ledifolia Alba*). Snow white, large flower, early to middle season, very hardy.

## VARIEGATED

**CRITERION**—White ground well marked with wide pink stripes, late and compact.

**INDICA ROSEA**—(*Ledifolia Rosea*). Extra large flower of white with rose throat. Mid-season, upright.

**VITATA FORTUNEI**—White ground, well striped with lavender pink. Very early, upright, open grower.

## AZALEA INDICA. BELGIAN VARIETY

**ALBERT ELIZABETH** — Large double flower, ivory-white with frilled deep pink edge. Leaves medium to large, waxy dark green. Mid-season.

**BLUSHING BRIDE**—Very beautiful large double flower, light pink in color. Leaves large and glossy. Middle to late season.

**COUNT DE KERCKHOV**—Large, fringed double flower and variegated rose pink in color with white edge. Leaves large and glossy. Middle to late season.

**MME. PETRICK SUPERBA**—Semi-double large flower light lavender in color with white edge. Leaves shiny green, narrow and small. Very early bloomer.

**TRIUMPHE**—One of the best varieties. Large double flower of dark crimson color. Leaves large and dark glossy green. Very vigorous grower. Blooms mid-season.

**VERVAENEANA**—Large double flower of salmon rose with lighter border. Leaves large and glossy green. Blooms early and a vigorous grower. Most popular variety.

**VERVAENEANA ALBA**—Best white variety. Flower large and full double white. Leaves large and shiny green. Blooms middle of the season.

**KURUME AZALEAS**

(*Azalea Obtusa*, Kirishima, or Kurume)

This variety which we today call "Kurume Azaleas" originated in the Kirishima Mountains in Japan and cultured and improved at Kurume, a city of the same province.

The flowers are small when compared to the Indicas but are a much more profuse bloomer; when in full bloom the leaves cannot be seen. Some produce a single flower, others a double flower which is described as a "hose in hose" type. As a group they are dwarf plants with small shiny dark green leaves.

The Kurumes withstand lower temperatures than the Indicas; when planted in sheltered locations they will thrive as far north as Long Island. These are ideal plants for pots, borders, and rock gardens.

Six most popular varieties of Kurume azaleas.

**CHRISTMAS CHEER**—Pleasant Christmas red, flower rather small, hose-in-hose. Heavy bloomer, early, compact.

**CORAL BELL**—A pleasing coral pink color shading deeper toward center. The flower is very dainty and is produced profusely. Hose-in-hose type. Low, compact.

**HINODEGIRI**—Most popular variety. Medium size, single flower of bright scarlet color. Leaves roundish, glossy green, very dwarf and compact.

**PINK PEARL**—Most noble cherry rose color shading lighter to center. Hose-in-hose type. Mid-season, compact, but upright.

**SALMON BEAUTY**—Beautiful salmon pink, large size, hose-in-hose. One of the best salmon varieties.

**SNOW**—Pure white flower, blooms profusely in clusters. Hose-in-hose. Mid-season, low, compact, one of the best whites.

We also have in stock the following Kurume varieties:

**AMOENA**—lavender, hose-in-hose.

**AMOENA COCCINEA**—pink, hose-in-hose.

**APPLE BLOSSOM**—White shaded with pink, hose-in-hose.

**BENIGIRI**—Bright deep pink, single.

**BRIDE MAID**—Bright salmon red, single.

**CARMINE PRINCE**—Carmine red, hose-in-hose.

**DAYBREAK**—Light pink, hose-in-hose.

**FLAME**—Brick-dust red, single, very early.

**HEXE**—Crimson red, hose-in-hose.

**MAUVE BEAUTY**—Lavender, single.

**ORANGE BEAUTY**—Orange red, hose-in-hose.

**PEACH BLOW**—Single, pale shade of peach blossom.

**SALMON QUEEN**—Single, large flower, light salmon color.

**YAEGIRI**—Salmon red, hose-in-hose.

### KURUME AZALEAS

Left to Right: 6-8 inch, 8-10 inch, 10-12 inch

#### NEW KURUME AZALEAS

**FUJI-NO-ASAHI**—The flower is hose-in-hose, medium to large in size. Color: White with faint salmon pink flushed on the tips of the petals as sunlight would flash on the snowy peak of a mountain. Leaves are large and thick and very shiny dark green. It is a vigorous grower.

**HIME-KAGAMI**—Medium to small hose-in-hose flower. White with occasional stripes of faint pink. Very heavy bloomer. Vigorous, compact grower.

**KIN-TAIYO**—Large hose-in-hose with long white petals which are edged with bright orange. The flowers are very attractive and distinctive.

**KUMOI**—The flower is hose-in-hose medium to large with somewhat crinkled petals. Color: Light crimson-carmine with less coloring at the throat. Leaves are medium to large and shiny green.

**MIZU-NO-YAMABUKI** — Flower small, hose-in-hose; color is creamy white. This is the only variety of the several hundred Azaleas producing a yellowish flower. Leaves very small and a very compact grower.

**YAKUMO**—The flower is of medium size, hose-in-hose with roundish petals of maroon red. Leaves are roundish and medium; very compact.

**MACRANTHA AZALEA**

(Azalea Indicum Macranthum, Satsuki Azalea)

A distinct characteristic of this variety is the lateness of its blooming period. It blooms very late, usually in April, May and June and some throughout the whole summer. Those desiring to have Azaleas in bloom after spring should try these varieties.

The flower is similar to the Indicas in size and colors. Without its flowers it makes a very beautiful plant for the garden. It has very small and shiny dark green leaves; and grows compactly, dwarflike. Very hardy.

**BENI-KIRIN**—*Macrantha* hybrid. Flower very double, consisting of 15 to 20 petals; 1½ to 2 inches in diameter. Brilliant blood red with darker veins.

**CHIKU-BU SHIMA**—Dwarf type *Macrantha*. Flower large, hose-in-hose, variegated pink and white.

**FUJI-NISHIKI**—Very large flower with wavy petals. White striped with faint narrow lavender lines.

**GUM-PO**—One of the most dwarf *Azaleas* we have ever seen. Its numerous small twigs with tiny dark shiny green foliage forms a very compact and symmetrical plant. Bears large white flowers. Ideal for rock garden borders and potted specimens.

**IZAYOI**—*Macrantha* hybrid. Flower single, 3 inches in diameter with very pleasant flesh pink color.

**MACRANTHA**—Large single flower of clear pink, very late, low headed and compact.

**MACRANTHA DOUBLE**—Double flower of large size, clear pink. Very late, compact but rather upright.

**RED MACRANTHA**—Large single flower, dark orange red. Very beautiful.

**OKINA-NISHKA**—A very desirable dwarf type of *Macrantha* hybrid. Orange red hose-in-hose flower. Blooms heavily in the fall as well as in the spring.

**SAKURAGATA**—One of *Macrantha* hybrid (*Satsuki*). Flower is single, 2 to 2½ inches in diameter. Dark crimson with large patch of white in the throat, very beautiful. Leaves medium to small; shiny dark green.

**SEI-KAI**—*Macrantha* hybrid. Flower hose-in-hose. 2 inches in diameter, pure white in color. Leaves small, roundish, dark glossy green. This variety is most compact dwarf grower.

**SEI-QUA**—*Macrantha* hybrid. Flower single, 2 to 2½ inches in diameter. Color white, ground margined beautifully with salmon pink. Very compact grower.

**WAKAMATSU**—*Macrantha* hybrid. Flower, hose-in-hose, 2½ to 3 inches in diameter. Very delicate purple in color.

**WAKAEBISU**—Large hose-in-hose flower. Its bright salmon pink color is very attractive. A very heavy bloomer.

Price on *Macrantha Azaleas*:

8-10 inch, bushy, B&B.....	.60	5.00	45.00

**KAEMPFERI AZALEAS**

Very hardy plant with large blossoms. Its resistance to freeze is greater than any evergreen azalea. Grows rather slender and tall instead of spreading out.

**BETTY**—Brilliant pink of large size.

**FEDORA**—Deep salmon rose.

**MARY**—Pretty deep pink. Distinct from all others.

**OTHELLO**—Orange red, vigorous grower.

**PURPLE KING**—Purplish rose.

## CAMELLIA JAPONICA

Commonly known as "Japonica" in the South; becoming recently a most popular plant, not only in the Gulf Coast region, but all over the country. Its glossy green foliage all the year around, together with most attractive and beautiful flowers in winter, when no other flowers are found in the garden, has been increasing the admirers of the plant. Millions of them are set out every year in open grounds or in conservatories and green houses as pot plants. It will regain without any doubt a popularity stronger than it possessed half a century ago even as cut flowers.

### Brief Cultural Hints

**Soil Preferred**—Camellia grows in almost any soil, but well drained, good garden soil a little acid in reaction is more suitable.

**Location Desirable**—Half shady location is preferable, especially when the plants are young. Free blooming cannot be expected in a place entirely shaded.

**Root System, Transplanting**—The root system of the Camellia is rather coarse and not quite so easily transplanted as the Azalea.

**Fertilization Effective**—The Camellia is a gross feeder; it responds well to fertilization. At the time of planting, if the soil is not fertile enough, use a mixture of one-half of garden soil, one-fourth of well rotted cow manure and one-fourth of peat or leaf mold. Every winter or early spring apply well rotted cow manure; bone meal or cotton seed meal, or similar commercial fertilizer may be added if necessary. Mulching with half rotted leaves or peat is also beneficial.

**Proper Watering**—The Camellia loves a humid atmosphere. Do not neglect the watering. Frequent syringing on the leaves helps a great deal during the dry summer months.

**Pruning Right**—Proper pruning is also essential. Prune with care such as water shoots, dead or injured branches and branches growing too close together. General pruning should be done in the month of February; otherwise it may have a bad effect on the flower buds.

**Spraying Advisable**—Red spider and various scales may attack Camellias. We have been using "Volck Jr." at the ratio of 1 to 40 in the summer and 1 to 25 in winter, mixing one teaspoonful of Black Leaf 40 to every gallon of solution. Thorough spraying twice a year controls these pests satisfactorily. The strong sun has to be avoided after spraying as it may cause the leaves to burn.

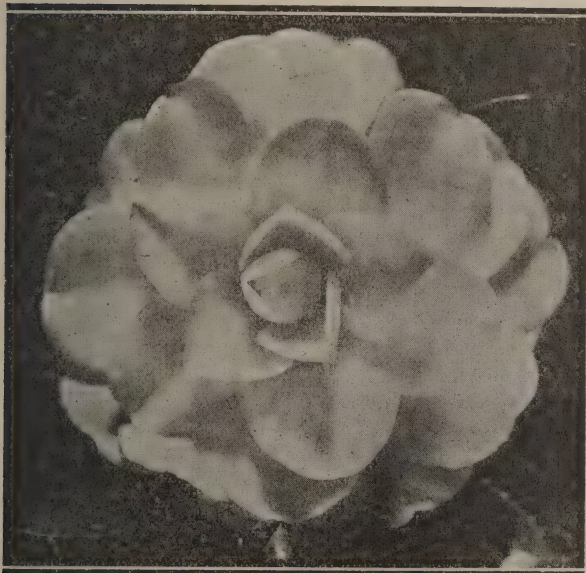

## NEW CAMELLIAS

For many years we have devoted much of our time and care to produce new varieties of Camellias. Our tireless efforts in this enterprise have been rewarded. We are proud to introduce to our customers this year a number of these unusual and very exquisite new creations.

As our supply of these new varieties is very limited, we are able to offer them only to the purchasers of standard varieties of Camellia. No discount of prices.

## MRS. K. SAWADA

**Camellia. Mrs. K. Sawada**  
(U. S. Patent No. 481)

We take great pleasure to introduce this beautiful new Camellia to our customers

We have named this variety for the wife of the originator who devoted much of her time in helping him in his work along this line. Unfortunately, she passed away without seeing this beautiful flower. It seems to us that this flower represents exactly Mrs. Sawada's appearance and character—such purity, gentleness, warm-heartedness, and sweetness of disposition, etc.

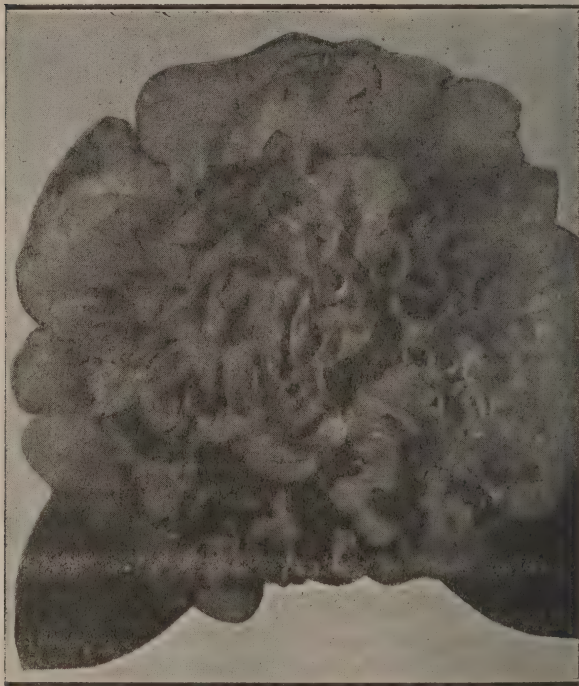

The flower is full double, gardenia-type, imbricated. It is 3 to 3½ inches in diameter, consisting of 70 to 100 petals. Color is delicate pink, shaded on white. The flower resembles the flower of Lady Humes Blush somewhat, but is slightly larger in size, blooms heavily from February to March. The lasting quality as a cut flower is exceptionally good. The leaves are small, of finer texture, very vigorous, upright grower, very compact, with long, slender branches. Its resisting power against the freeze is very great.

Many florists who have seen this flower agree that this is the most ideal Camellia flower for their corsage work.

## MENA LADNIER

This new variety was originated by Mrs. Wilhelmina Ladnier of Pascagoula, Miss. Many years ago she planted many Camellia seeds and this wonderful flower came out among them. We have named this variety "Mena Ladnier," honoring the originator by her consent.

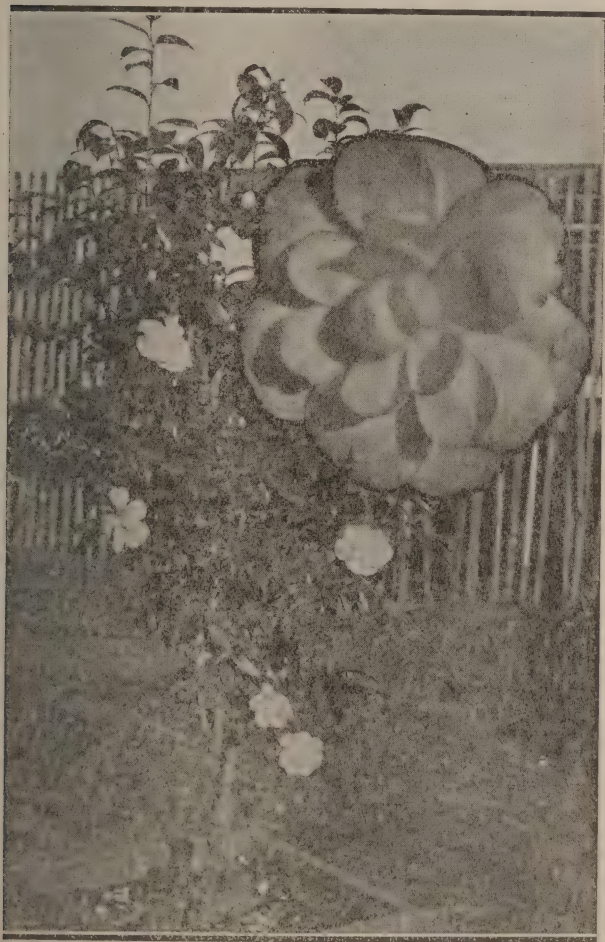

The flower is full double, 4½ to 5 inches in diameter. There are 24 guard petals and 90 to 100 small petalalets which compose a peony form. The color is usually brilliant blood red, but occasionally a flower slightly marked with white is found, also solid pink flowers may bloom on the same tree. The flowers bloom mid-season. This variety grows very vigorously and has thick, heavy, coarse branches. The leaves are exceptionally large and are very shiny dark green.

Camellia. Mena Ladnier

**K. SAWADA (U. S. Patent No. 431)**

This most outstanding new Camellia was recently created by us. The flowers are of pure white, very double, and fully imbricated. It is usually 4-5 inches in diameter, but often much larger. It has 50-70

**Camellia K. Sawada**

petals, the edges of which are rolled inward and are symmetrically overlapping each other. When the flower is fully opened it sometimes shows a few small petaloids or yellow stamens in the center. It blooms from January to March, a very heavy and free bloomer. The leaves are medium in size and thickness, elliptical to lanceolate, and serrated, and leathery and dark green. Growth is very vigorous, semi-upright, and very compact and symmetrical. This new Camellia is much hardier than Alba Plena. Everyone who has seen this new Camellia agrees that it is the best white Camellia we have ever had in this country. This is the most profitable variety for cut flowers.

**Price on above three new camellias:**

	Each	10	100
6-8 inch from 2½-3 in. pot	2.00	15.00	100.00
8-10 inch, from 2½-3 in. pot	3.00	25.00	200.00

lath house grown, B&B	5.00	40.00	350.00
15-18 inch,			
lath house grown, B&B	7.50	60.00	
18-24 inch,			
lath house grown, B&B	10.00	90.00	

Also we can supply these three varieties in grafted plants. The sizes and prices are as follows:

One or two year top on 4 to 5 year old stock:

12-15 inch top.....	7.50
15-20 inch top.....	10.00
20-24 inch top.....	12.50

We are introducing to you the following new camellias—all of which were created and developed by us. Everyone who saw the blossoms of these new camellias at our nursery grounds and at the various Camellia Shows throughout this region were hearty in their agreement that these new varieties far excelled all other varieties of camellias. As we have only a few plants of each of the varieties, it was our desire to withhold these camellias from the market for a few years, but we were urged so strongly by our camellia customers to make these varieties available that we are obliged to offer them this year. So it is with extreme pleasure and satisfaction that we introduce these splendid new varieties to you.

The supply of these varieties is very limited.

**SMILING BEAUTY (Seedling J)**

The flower is semi-double, 3½-4½ inches in diameter, and has fourteen to sixteen obovate petals of a most pleasing and distinctive delicate pink which is slightly deeper in color than Magnolia Flora.

**WHITE KING (Seedling K)**

The flower is semi-double, 4-5 inches in diameter, and has petals that are thick and large and of a porcelain texture. The color is snowy-white with numerous yellow stamens at the center. Leaves are thick and large.

**WHITE QUEEN (Seedling A)**

A very large semi-double flower sometimes measuring over six inches. The petals are pure white, somewhat small and pointed at the tips. An early to mid-season bloomer. The leaves are thin, curled and deeply serrated.

**WHITE EMPRESS (Seedling M)**

The flower resembles very closely the Empress (Lady Clare), but is of pure white. It is a very large semi-double flower. Blooms early to mid-season.

**VICTORY WHITE (Seedling D)**

Flower is semi-double, of the peony type, measuring 4-5 inches in diameter. Pure white in color. Numerous small petalets intermixed with yellow stamens at the center. A very heavy bloomer at mid-season.

**WHITE HIBISCUS (Seedling O)**

Single to semi-double flower of 4-5 inches in diameter. The petals are long and narrow and of snowy white. This variety resembles very closely the Imura, the only difference being that there are fewer petals that are more simply arranged in this variety. An early bloomer, blooming about Christmas time. The leaves, long and narrow and crinkled, are borne on long, slender twigs.

**RED HIBISCUS (Seedling I)**

The color of this flower is a deep pink to a bright red. Usually the flower is semi-double in form, but often the stamens are changed to small petalets to form a flower of the peony type. The flower measures 4-5 inches in diameter. Leaves are stiff and serrated and borne on strong upright branches. An early bloomer.

## **BLUSH HIBISCUS (Seedling B)**

A very large single to semi-double flower, resembling the giant Mallow Hibiscus. The color is white with blush pink at the center. A very beautiful flower. A very vigorous grower with large dark green leaves.

We can only supply the above newest varieties in grafted plants: one year old top on four to five year old root.

**Sizes and prices are as follows:**

12-15 inch top, B&B..... 7.50 each

15-20 inch top, B&B.....10.00 each

20-24 inch top, B&B.....12.50 each

We can also supply Smiling Beauty on its own roots.

6-8 inch, 2½ inch pot..... 2.00 each

8-10 inch, 2½ inch pot..... 3.00 each

10-15 inch, lath house

grown, B&B..... 5.00 each

15-20 inch, lath house

grown, B&B..... 7.50 each

## **IMURA (Our Seedling #12)**

Semi-double flower 5 to 6 inches in diameter, consisting of 15 large petals of a snowy white and porcelain texture and numerous yellow stamens in the center. The anthers of the flower is very large and shaped like an arrow or spear, very distinct from other varieties. Blooms mid-season. Leaves are large, narrow and long, smooth, very shiny dark green.

We can supply this variety cutting grown.

6-8 inch, from pot..... 2.00 15.00

8-10 inch, from pot..... 3.00 25.00

Grafted plants, one to two year top on 4 to 5 year roots:

12-15 inch, B&B ..... 5.00

15-20 inch, B&B..... 7.50

## **LURIE'S FAVORITE (Our Seedling #172)**

Semi-double flower 4 to 5 inches in diameter. Has 16 to 18 petals which are crinkled and resemble crepe paper in texture. Color: soft lavender pink with darker veins. Blooms abundantly in mid-season. Leaves very small, roundish, smooth and very shiny dark green. Compact grower.

## **QUEEN BESSIE (Our Seedling #127)**

Semi-double, 3½-4½ inches in diameter, very wavy large petals and numerous yellow stamens. Color: clear white with faint flushes around the center presenting a very soft and delicate appear-

ance. One of our best hybrids. Blooms late season, rapid grower with large green dark leaves.

#### **RISING SUN (Our Seedling #177)**

This is one of the best single flowered Camellias that we have. The flower which is 4 to 5 inches in diameter opens flat showing 6 large petals and numerous yellow stamens. Certainly a beautiful flower—bright crimson red of velvety softness. Anthers are a bright yellow, filaments pink.

#### **SARA-SA (Our Seedling #119)**

Semi-double flower 4 to 5 inches in diameter. Has 12 large petals and yellow stamens at the center. Flesh color dotted and striped with darker pink. Blooms mid-season. Large leaves; very vigorous grower.

#### **WHITE PINE CONE (Our Seedling #179)**

Flower semi-double, 3 to 4 inches in diameter with 16 narrow pointed incurved petals. This flower is quite different from all others in shape. It resembles a pine cone before it opens. Pure white in color, blooms late. Leaves large and thick, rapid grower and very hardy.

#### **FRIZZLE WHITE (Our Seedling #128)**

Semi-double, 3½-4½ inches in diameter, very wavy crinkled petals intermixed with numerous yellow stamens. Resembles Super Nobilissima but much larger. The flowers are pure white. The leaves are small narrow and pointed.

#### **TRICOLOR SUPERBA (Our Seedling # 158)**

The flower, much larger than Ordinary Tricolor, is semi-double, consisting of 12-15 large petals and numerous yellow stamens at the center. The color varies from nearly white to solid red, but the majority of them are white striped with red, or a light pink with white margin like the Herme flower.

#### **HERME-SPORT**

We originated this new variety from Herme and have been watching this plant for more than ten years. We have found that the new characteristics are firmly established. The flower is very large, 4-5 inches, semi-double peony type, much heavier than ordinary Herme. Color, dark crimson with white spots. Very beautiful.

**Prices on above new varieties:**

	Each	10	100
6-8 inch from pot.....	1.50	10.00	80.00
8-10 inch, from pot.....	2.50	22.00	150.00
10-15 inch, lath house grown, B&B.....	3.50	30.00	
15-20 inch, lath house grown, B&B.....	5.00	45.00	
20-24 inch, lath house grown, B&B.....	7.50	70.00	

**RARE CAMELLIAS**

These varieties are the finest and are still scarce on the market today. Our supply of this class is still limited; please order early for your needs. No discount given for this division. We have some varieties in sizes larger than listed. Write for particulars.

**DONKLAARI**

An old variety but still holds the highest admiration and is very scarce. Flower is very large, 5 to 6 inches in diameter, consisting of 18 to 20 large petals and numerous yellow stamens at center. Color, dark crimson red, mottled with white. Sometimes the color of edge of petals are faded to magenta red. Blooms mid-season, very slow grower with small foliage.

**LA REINE VARIEGATA**

Semi-double, very large flower, sometimes measuring over 6 inches in diameter. Deep pink to red in color, blotched with white spots. Very beautiful and attractive, blossoms at mid-season. A good grower with large foliage.

We can supply the above two varieties in grafted plants, one year old top on 4 to 5 year old roots.

12-15 inch ..... 5.00

15-20 inch ..... 7.50

**VICTOR EMANUEL**—The finest camellia that we know today. Very large peony shaped flower, deep velvety red. Blooms late season.

**PURPLE EMPEROR**—(Mathotiana Rubra, Purple Dawn, etc.)

Flower very large, 5 to 6 inches in diameter. Rose type, dark crimson red mixed with purple.

**C. M. HOVEY**—Flower resembles Purple Emperor, but variegated with white. Very fine.

- JULIA DRAYTON**—Very large flower, rose type, resembles Purple Emperor.
- SARA C. HASTIE**—(Debutante)  
Flower peony type, very light pink. Blooms very early.
- EMPEROR**—(Emperor of Russia)  
Semi-double to double flower of large size. Has large petals of dark crimson red. Very large and roundish thick foliage.
- EMPRESS**—(Lady Clare, Grandiflora Rosea, etc.)  
Single to semi-double, light pink and very large flower.
- GIRARD-DE BAILLON**—We believe this to be the most charming Camelia now in existence. The flower is not very large, 3 to 3½ inches in diameter. But it is an attractive form of peony type with a charming color combination of brilliant red and white. A slow grower.
- LADY HUMES BLUSH**—Very famous old variety but yet rare. Full double rose type flower, white with delicate flesh pink. One of the best for corsages.
- LAUREL LEAF**—Very large flower. Full double, light salmon pink blotched with white. Leaves narrow and pointed like a Laurel leaf.
- COMTESSE NIEPORT**—Flowers are full double peony type with 8 to 10 large guard petals and 12 to 15 medium sized petals intermixed with numerous yellow stamens. Petals are very crinkled, soft pink spotted with faint white. Blooms very freely and in mid-season.
- GIGANTIA (Kellingtonia, Magnolia King)**—Semi-double, very large flower usually 5 to 6 inches in diameter. Color, red marked with white. Large groups of yellow stamens at center. Leaves are extra large and thick, very dark, shiny green.
- VEDRINE (Our Lewis Red Peony)**—Semi-double to double peony type flower, 4 to 5 inches in diameter often 6 inches. Color is a brilliant red shading into a deep crimson with a velvety tone. This fine variety blooms mid-season.
- DAIKAGURA**—Flower double peony type, very large, deep rose in color. The distinctive character of this variety is its early blooming. It starts generally in September.
- DAIKAGURA VARIEGATA**—Same as above but flower is variegated beautifully with white spots. Slow grower.

**GLEN 40**—As we do not know the real name of this variety, we are following temporarily the name by which it is locally called. The flower is full double, rose type, resembles Colonel Firey, but slightly larger in size, and color of the flower is more scarlet. Leaves are thick and stiff with dull point. Very slow grower.

**H. A. DOWNING**—Semi-double flower, very large. Color is bright crimson to carmine red. Sometimes spotted with white.

**MARCHIONESS OF EXETER**—Full double, peony type large flower of soft pink. Blossoms at mid-season. Vigorous, but rather loose grower.

**NAGASAKI**—This is one of the largest flowered camellia. It usually measures 5 to 6 inches in diameter. Semi-double flower with 12 to 14 large petals and a few small ones intermixed with yellow stamens. Color usually white on soft pink ground, but sometimes shows pink spots on white ground. Very beautiful. Blooms early to mid-season.

**PRIDE OF GREENVILLE**—As we do not know the real name of this variety, we are following its local name temporarily. Flower very large, full double. peony type. Bright red in color, very beautiful. Blooms at mid-season. Upright grower.

**Price on above rare varieties:**

	Each	10	100
6-8 inch, from pot.....	1.00	8.50	75.00
8-10 inch, from pot.....	1.50	12.50	100.00
10-15 inch, lath house grown, B&B.....	2.00	17.50	150.00
15-20 inch, lath house grown, B&B.....	3.50	30.00	
20-24 inch, lath house grown, B&B.....	5.00	45.00	

We also offer grafted plants of following varieties: **Sara C. Hastie, Laurel Leaf, C. M. Hovey:**

8-12 inch, one year top on 5 year old root.....	2.00
12-15 inch, one year top on 5 year old root.....	4.00
15-20 inch, one year top, on 5 year old root.....	6.00

**AUGUSTA WILSON**—It is our great pleasure to have named this variety "Augusta Wilson in memory of a famous writer of Mobile. She was very fond of this variety and planted it in the gardens of her home in Ashland Place many years ago.

The flower is very double and peony type, 3½ to 4 inches in diameter. It is a soft pink; some flowers are marked with faint white spots. Blooms before Christmas: Leaves are large, thick and roundish.

**ALBA PLENA**—Very famous old variety, yet very scarce. Flower is full double, pure snowy white. One of the best whites, but tender.

**Camellia Monarch**

**COLONEL FIREY** (No. 47)—The flower is 4 to 5 inches in diameter with 90-100 symmetrically overlapping petals. Bright red to deep vermillion red. Blooms in mid-season to late.

**DAINTY**—The single flower, 3 to 3½ inches in diameter, is bell shaped. Has five petals of soft pink and numerous yellow stamens. A tree loaded with blooms is a charming sight.

**FANNY BOLLIS**—Large semi-double flower, red blotched with white.

**GOVERNOR MOUTON**—A famous variety from Louisiana. A large peony type flower, oriental red marked with white spots. Free bloomer at mid-season.

**LADY VAN SITTI VARIEGATA**—One of the most beautiful of variegated Camellias. Semi-double flower 3½ to 4 inches in diameter often reaches 5 inches. Pure white base striped with various shades of red. Leaves are small and narrow, very crinkled. Grows upright and compact.

**KUMASAKA**—A Japanese variety. Large peony type flower of deep pink.

**MARY E. M. (From Jungle Gardens)**

Large salmon pink flowers, semi-double. Blooms from mid to late season. Vigorous grower and free bloomer.

**MATHOTIANA ROSEA**—Sport from Mathotiana Alba. Very double flesh pink, rose type.

**MONARCH**—(Gunelli, Honneur D' Amerique)

Peony type flower of deep pink often spotted with white. Blossoms often measure six inches across.

**MONJISU**—Semi double, medium size flowers of brilliant carmine red with a satin like sheen. Very compact grower with small, glossy, extra dark green leaves.

**PURPLE PEONY**—(Wm. Penn)

Flower semi-double, peony type of medium size. Real dark crimson to deep purple color with large white markings. Plants are very slender with weeping branches of deeply serrated leaves.

**SWEETI VERA**—Flower large, semi-double type. Flesh pink ground marked by small stripes or dots of deeper pink. Blooms early to mid-season.

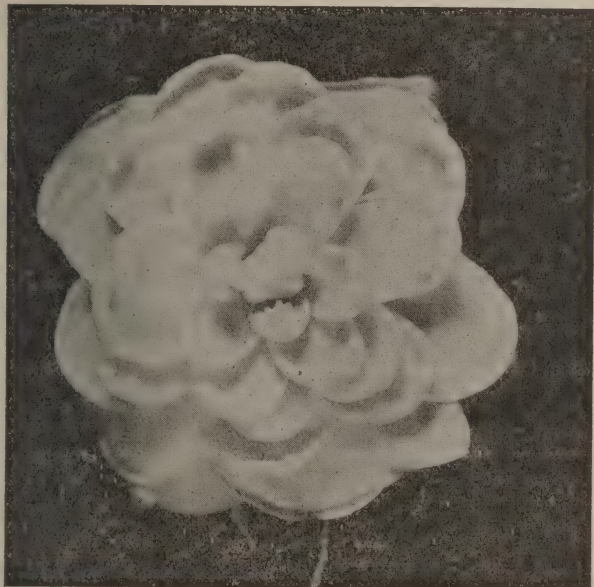

**TEUTONIA**—Full double rose type. The tips of the petals are curved in; petals overlap each other symmetrically. The original tree produced various colors—fleshy pink, white faintly striped with pink and dark. Very slow and compact grower.

One of profitable varieties for cut flowers.

**Prices on above varieties:**

	Each	10	100
6-8 inch, from pot.....	.50	4.00	35.00
8-10 inch, from pot.....	.75	6.00	50.00

20-24 inch, lath house grown, B&B.....	2.50	22.50	200.00
Price on larger size field grown plants on application.			

**Camellia Teutonia, Pink**

**INVITATION TO CAMELLIA LOVERS**

We erected a small camellia house last season and are keeping several hundred of the most rare camellias, including all of our new varieties. The plants are well protected from severe freezes so that they can produce flowers characteristic to the varieties. This was a most magnificent sight last January and

February when all of the plants burst in bloom. Many thousands of visitors enjoyed not only seeing this beautiful floral display, but also studying the different varieties.

We expect to open our house again this season to our camellia friends. You are cordially invited.

## STANDARD VARIETIES

### Group A:

**ANNA FROST** — Semi-double, large loose peony type, dark blood red in color. Large, round and thick extra shiny dark green leaves.

**BELLE ROMANA**—Full double flower 3 to 3½ inches in diameter made up of 70 to 80 petals. The flower is very soft pink striped profusely with dark crimson.

**CHANDLERI ELEGANS** — Semi-double to double peony type flower. The flower, one of the largest of all Camellias, is a pretty cherry red with white variegations. Blooms mid-season; slow grower.

**CAMEO PINK**—Full double, rose type flower of medium size. Color light pink. Very desirable for cut flower.

**CANDIDISSIMA**—Very double flower of medium size. Petals overlap each other symmetrically forming a star. Pure white bloom in late season.

**COUNTESS OF ORKNEY**—Large, very double rose type flower. The usual color is white with pink stripes, but sometimes solid pink flowers appear on the same bush. Slow and compact grower, but blooms very young. Fine variety for pot culture.

**DERBYANA (J. G. Peonyflora)**—Very large flower blooms late season. Semi-double to double peony type. Dark crimson in color. Very vigorous grower.

**ELLEN McKINSEY** — Flower medium to large, peony type, dark crimson spotted with white. Blooms very early, preceded only by Daikaguara. The leaves resembles Prince Albert.

**FLESH PINK PEONY (Shell Pink by McIlhenny)**  
One of the latest bloomers. It starts blooming when most of the other varieties are through blooming. The flower is medium, peony type of beautiful flesh pink. It is a heavy bloomer and compact grower.

**HÉRME**—Very large semi-double flower variegated pink and white. Generally, the margin is white. A very popular variety.

- IMPERATOR**—Full double peony type, medium size flower of brilliant Christmas red. Very attractive.
- IL TRAMONTE** (different from **LAUREL LEAF**)  
Flower medium size, full double, rose type. Resembles Laurel Leaf, but smaller in size. Stocky grower with large, round, thick foliage.
- LADNIER'S RED**—(Prince Eugene Napoleon, Pope Pius IX, etc.)—Large flower, very double, bright red to dark red, sometimes spotted with white. Hardy and a free bloomer.
- LADY VAN SITTI**—Very large flower, semi-double, of a most pleasant shade of red. Blooms freely mid-season. Very small and narrow pointed leaves, crinkled and very shiny dark green. Upright grower.
- LADY SAUMAREZ**—Large single to semi-double flower. Brilliant dark red with white spots. Resembles Donkelari, but smaller. Early and free bloomer.
- MARIE LOUISE (No. 60)** — Double peony type flower of medium size. Pleasant red marked with white—very beautiful. Slow grower and has spreading habit.
- OPELOUSA PEONY**—(Althea Flora by some Nurseries)—Peony form flower with light pink and white; occasionally they are solid pink.
- OTOME**—Full double, flesh pink with darker veins. Much like Pink Perfection.
- PINK PERFECTION**—Most popular variety. Full double, light pink. Early and free bloomer.
- PROF C. S. SARGENT**—Full double, peony type, tightly formed. Very dark red color. Blooms freely mid-season. A very popular variety.
- PURITY**—Pure white, full double flower with open center.
- STILE'S PERFECTION PINK**—(Formerly called by us Rubra Virginalis)—An outstanding variety. Peony type flower 3½ to 4 inches in diameter. Pleasant soft pink color. Early and free bloomer. Small leaves.
- WHITE TRICOLOR**—A sport of Tricolor. Pure white semi-double flower with yellow stamens in the center.
- TRI-COLOR SIEBOLDI**—Semi-double, variegated of pink and red with white. Attractive flower, and heavy bloomer. One of dependable varieties for out-door planting.

**LATE TRICOLOR**—This variety was obtained from the West Coast. Flower is much larger than original Tricolor. Blooms very late.

**Price on Group A:**

	Each	10	100
6-8 inch, from pot.....	.35	3.00	25.00
8-12 inch, from pot.....	.50	4.00	35.00
12-18 inch, lath house grown, B&B.....	.75	6.00	50.00
18-24 inch, lath house grown, B&B.....	1.25	8.50	75.00
18-24 inch, specimen B&B	2.50		
24-30 inch, specimen B&B	3.50		
30-36 inch, specimen B&B	4.50		
3 to 4 feet, specimen B&B	6.50		
4 to 5 feet, specimen B&B	8.50		

**GROUP B:**

**ABBY WILDER, PINK**—Full double peony type flower, medium size, flesh color. Very beautiful.

**BROOKLYANA**—Very double, medium sized flower; deep pink mottled with white. Blooms early. Leaves large and thick. Vigorous grower.

**CARNATION**—(Rose Emry, Orient, etc.)

Medium sized peony type flower. Dark red crimson blossoms look like carnations. Very hardy.

**CHEERFULNESS**—Double, medium sized rose type flower. Deep pink, blooms very early. Upright grower.

**CREO PINK**—Large single flower, 4 to 4½ inches in diameter. Flower has 7 large wavy petals and numerous yellow stamens which forms a cylindrical mass in the center. Color, purplish pink with darker veins.

**DIXIE** — Medium sized flower, very double, rose type. Rose pink petals symmetrically formed.

**DUKE DE ORLEANS (Marguerite Guillon)**—Large flower, peony type; creamy white striped and dotted with pink and red. Hardy and blooms well.

**ELATA** — Very large semi-double flower. Semi-peony type with yellow stamens. Deep rose to carmine color. Blooms mid-season.

**ELIZABETH** — Flower double, medium, usually white but often striped with faint narrow pink stripes. Very strong grower.

**GLORE DE NANTES**—Large semi-double flower, deep rose color. Leaves are large, roundish, thick and very shiny dark green, which easily identifies it from all other. (No small sizes.)

**JARVIS RED**—Large semi-double flower with long crinkled petals. Dark vermillion color. Very popular on the Gulf Coast.

**MATHOTIANA ALBA**—Large full double rose type flower, pure white but occasionally striped with faint pink. Leaves very large and thick.

**MRS. HOFFEINS VARIEGATA (No. 27)**—Large semi-double flower, white striped with pink. Sometimes a solid pink flower is produced on the same bush.

**PRINCE ALBERT**—Flower, medium sized, peony type, soft lavender-like pink spotted with white. Leaves are deeply serrated and rather light green.

**RUBRA VIRGINALIS**—(Formerly called Jeanerette Pink by us). More familiar along the Louisiana coast. Loose peony type, salmon pink. Very fast grower.

**SARAH FROST**—Very popular on the coast. Dark crimson, full double rose type. Hardy.

**TRICOLOR**—Large single to semi-double flower, white striped with pink. (Once in a while it produces a red flower.)

**T. K. VARIEGATA**—Semi-double, medium size flower of light pink with darker pink margin. Blooms well regardless of the weather. One of the most dependable varieties.

**WARRATAH (Honeycomb)**—Very double, peony flower. Resembles Prof. Sargent, but the guard petals are five in number and the center of the form is very tight like a comb of honey.

**WM. DOWNING**—Semi-double, large flower, 4 to 5 inches in diameter, 9 to 12 large, straight, thick petals which are purplish pink or red. Very vigorous grower and very resistant to cold.

### CAMELLIA JAPONICA

Left to Right: 2 ¼ inch Pot; 8-12 inches lathhouse, B&B; 12-18 inches lathhouse, B&B

### CAMELLIA SASANQUA

Despite its recent introduction to this country, the Camellia Sasanqua has already become widely known and is gaining popularity among flower-lovers with wonderful rapidity. It blooms ahead of Japonica by months—generally from Septem-

ber to December. Size of blossom is about the same as *Camellia Japonica* in different colors. Leaves are much smaller and the branches are slender, which appearance gives a softer tone to landscaping. It has value also as a pot plant.

## CLEOPATRA

One of our introductions from Japan. The flower is semi-double, peony type, 3 inches in diameter with 12 to 14 petals and a few yellow stamens. Color is rose pink. The leaves are roundish in shape and dark shiny green. Very compact grower.

	Each	10	100
4-6 inch, C. T. ....		2.00	15.00
6-8 inch, C. T. ....		2.50	20.00
8-12 inch, C. TT. ....		3.00	25.00

18-24 inch, field grown, B&B	1.50	12.50	
2-3 feet, field grown, B&B	2.50		

**BRILLIANCY**—Color is same as *Cleopatra*—bright cherry red—but the flower is large and single. The leaves are narrow and thick, dark shiny green. This is one of the most beautiful *Sasanquas*.

4-6 inch, C. T. ....	1.50	12.00
6-8 inch, C. TT. ....	1.75	15.00
8-12 inch, C. TT. ....	2.25	20.00
12-18 inch, C. TT. ....	.50 3.00	25.00
2-3 feet, field grown, B&B	1.50	

**DAWN (Akebono)**—This is the hardiest *Sasanqua* of all, withstanding the severest freezes. When the buds of the other varieties are frozen its blooms stand perfectly. The flower is single to semi-double ivory white with flesh pink at the margin of the petals and yellow stamens. The leaves are small, narrow, dark shiny green. Very compact, symmetrical pyramidal shape; slow grower.

4-6 inch, C. T. ....	2.00	15.00
6-8 inch, C. T. ....	2.50	20.00
8-12 inch, C. TT. ....	3.00	25.00

**NEW CAMELLIA SASANQUA**—This is the second year that we are offering to you these new Sas-anquas which we developed.

### **1. MUTT'S WATERMELON PINK**

Grows tall and slender with beautiful watermelon colored flowers of the single type.

### **2. JEFF'S WATERMELON PINK**

Short and fat with rosetted branches and large, thick leaves. The flower is single, but very large; beautiful watermelon pink in color.

### **3. ROSEA PAPAVER**

Has large single flowers shape of poppy. Color is very delicate soft pink. A vigorous grower.

### **4. CRIMSON VELVETTI**

The flower is single, with 8-9 petals. The color of flower is beautiful crimson with a velvety tone.

### **5. WILLOW LEAF**

The leaf is very narrow, much resembling a willow leaf. Symetrical, pyramidal shape, with very compact branches. Flower is single. Color is white with pink margin.

## 6. ROSEA GRANDIFLORA

Very large flower with 7 to 9 large, long petals. This flower opens flat, quite different from Rosea Papaver. Color: Light soft pink. Bush grows wider than its height.

## 7. LAVENDER QUEEN

Large single flower of deep lavender pink.

## 8. TRICOLOR MAGNIFICA

Single flower with 6 petals, medium size. The color is beautiful three-tone—white in the center, outer edge of lavender, and between these two colors filled by soft pink. Compact, upright grower.

## 9. GRANDIFLORA ALBA

Flower single, very large 4 to 4½ inches in diameter. Color is snow white. A very vigorous grower.

## 10. FLORIBUNDA

Flower is medium in size with 5 petals. White with lavender margin—very beautiful. This is one of the heaviest bloomers. Slender, upright grower.

**Flowers of Gordonia**

### **ILEX (Holly)**

Holly of any variety in general is very difficult to transplant, therefore we offer this year some varieties carefully grown in pots, as we know that the best results are to be obtained by this method.

#### **I. CASSINE (Dahoon Holly)**

A popular evergreen, native of northern Florida. Leaves have no spine, much resembles Ilex Integra, but not so shiny green as the others. Producer of bright red berries in abundance.

#### **ILEX CASSINE ANGUSTIFOLIA**

An evergreen with very narrow leaves. Produces red berries at an early age.

12-18 inch, C. TT.....	1.25	10.00
18-24 inch, C. TT.....	2.00	15.00
3-4 feet, field grown B&B....	1.50	
4-5 feet, field grown B&B....	2.50	

## ILEX CORNUTA FEMINA

This is the berry-bearing Chinese Holly. Our cuttings were taken from berry producing specimens.

	Each	10	100
4-6 inch, 2½" pot.....		.90	7.00
6-8 inch, 2½" pot .....		1.25	10.00

## ILEX CORNUTA BURFORDI

A handsome form of Ilex Cornuta. The leaves are shiny green with one lone spine at the apex. Our cuttings were taken from berry bearing specimens.

4-6 inch, from 2½" pot.....	1.00	7.00
6-8 inch, from 2½" pot.....	1.25	9.00
2-3 feet, field grown, B&B	1.50	
3-4 feet, field grown, B&B	2.50	
4-5 feet, field grown, B&B	3.50	

## ILEX CRENATA

(Dwarf Japanese Holly)

## ILEX CRENATA ROTANDIFOLIA

Similar to above variety, but the leaves are much larger and roundish.

Prices on above two Ilex:

8-12 inch, C. T.....	1.00	8.00
12-18 inch, C. TT.....	1.25	10.00
18-24 inch, field grown B&B	1.00	
24-30 inch, field grown B&B	1.25	
30-36 inch, field grown B&B	1.50	

## ILEX INTEGRA

A very beautiful evergreen. Has dark shiny leaves which taper at the point. Bears white flowers in May and beautiful red berries in the winter.

4-6 inch, C. 2½" pot .....	1.00	8.00
6-8 inch, C. 2½" pot .....	1.25	10.00

## ILEX LATIFOLIA

(Big Leaved Holly)

Hardy evergreen shrub. Leaves are oval to oblong-lanceolate, serrate, thick, and large. Bears small flowers in May and red berries in the winter.

8-12 inch, from pot.....	1.50	12.00
12-18 inch, from pot.....	2.00	15.00

## BERRY-BEARING HOLLIES

Left to Right: American holly 2½ inch P.; Chinese holly 2¼ inch P.; Yaupon 2½ inch P.

## ORIENTAL MAGNOLIA

Although not known much in the South, Oriental Magnolias are most highly esteemed by Northern and Eastern gardeners. It is a very beautiful flower in early spring.

### M. DENUDATA

Well known as Magnolia Conspicua. Large, pure white flowers appear at early spring before its leaves come out.

2½ inch pot

(Spring delivery only).... .35 3.00

8-12 inch, field grown B&B .75

12-18 inch, field grown B&B 1.00

We offer a few plants grafted on Magnolia Kobus as follows:

18-24 inch, B&B..... 2.00

24-30 inch, B&B..... 2.50

### M. DENUDATA HYBRID

Grows to a tree 25 to 30 feet high. Flower much larger than M. Soulangeana, 9 petals. Color ranges from white with pink to almost white. Leaves roundish and very large. One of the best magnolias.

2½ inch pot

(Spring delivery only).... .2.50 20.00

12-18 inch, field grown B&B .90

18-24 inch, field grown B&B 1.50

### M. ALEXANDRINA

Hybrid of Magnolia Denudata and Magnolia Liliflora. It is similar to M. Soulangeana, but

grows much taller and both the flower and foliage are larger. Large flower of nine petals, heavily flushed rose purple with darker lines. Leaves somewhat curled and of a very soft texture. In our nursery Alexandrina blooms from a week to 10 days later than Soulangiana. Hardy and vigorous grower. The parent trees from which our cuttings are obtained are over 35 feet high. This magnolia is more beautiful than Soulangiana; a very valuable kind.

	Each	10	100
2½" pot, 2 year old.....	.30	2.50	20.00
12-18 inch, field grown B&B	.75		
18-24 inch, field grown B&B	1.25		
2-3 feet, field grown B&B....	2.00		
3-4 feet, field grown B&M....	3.00		

#### M. LILIFLORA

Lily shaped flower, dark purple at the outside and creamy white on the inside of the petals. Late bloomer.

2½ inch pot, 2 year old.....	1.50	12.00
2-3 feet, field grown, light B&B .....	1.25	10.00
3-4 feet, field grown, heavy B&B .....	1.50	12.50
4-5 feet, field grown, very heavy, B&B .....	2.00	17.50

#### M. SOULANGEANA

Most popular variety, also known as "Saucer Magnolia." Flower white with rose pink base. Blooms profusely before leaves appear.

2½ inch pot (Spring delivery only).....	1.75	15.00
12-18 inch, field grown B&B	.75	
18-24 inch, field grown B&B	1.00	

#### M. SOULANGEANA NIGRA

Similar to M. Liliflora except its much darker purple color on both sides of the petals.

2½ inch pot (Spring delivery only).....	1.25	10.00
2-3 feet, field grown B&B....	1.25	
3-4 feet, field grown B&B....	1.75	

## M. SOULANGEANA LENNI

When open the flower is saucer shaped, very dark vermillion red or purple in color. Late bloomer.

	Each	10	100
2½ inch pot (Spring delivery only).....		1.75	15.00

## M. SOULANGEANA LENNI HYBRID

Cross hybrid of M. Soulangeana to M. Liliflora. Character of growth similar to Liliflora. Leaves roundish and much thicker. Flower has nine petals instead of the six of Liliflora or Nigra. Much larger flower with dark purple color.

2½ inch pot (Spring delivery only).....	1.50	12.50
---	------	-------

12-18 inch, field grown B&B .75

18-24 inch, field grown B&B 1.00

## M. SOULANGEANA, DARKEST PURPLE

This new variety was established from some seedlings. The growth and habits resemble M. Soulangeana Nigra, but the flowers are larger and they have nine petals instead of the six petals of the former. Color is much darker purple than Nigra, almost black.

2-3 feet, field grown B&B.... 2.00

3-4 feet, field grown B&B.... 3.00

## M. STELLATA

(Star Magnolia)

Rather dwarf. Flower is much smaller than the other Magnolias, but is dainty, delicate, pinkish white, star shaped. Favorite in the spring garden.

2½ inch pot .....	2.00	15.00
-------------------	------	-------

18-24 inch, field grown B&B 1.50

2-3 feet, field grown B&B.... 2.50

3-4 feet, field grown B&B.... 4.00

4-5 feet, field grown B&B.... 5.00

## FLOWERING CHERRY

Heretofore it was believed by many Southern gardeners that the Flowering Cherry tree could not be successfully grown down South. It is now, however, proved by us that they can be, if the varieties best acclimated are used. You are invited to visit us and see for yourselves thousands of them thriving wonderfully and blooming in our nursery grounds.

### Japanese Flowering Cherry

Four years old (own root)  
12 to 15 feet in height.

### PRUNUS YEDOENSIS (Somei-Yoshino)

One of the most popular varieties in Japan, being planted in parks, temple grounds, school yards, along the river banks and highways in Tokyo. A rapid grower with rather slender branches. Estimated height about 30 feet. The flower is rather small and 3 to 6 flowers in a corymb or cluster. Pinkish white in color, slightly fragrant. It blooms profusely before young leaves sprout.

	Each	10	100
3-4 feet, own roots, BR .....	.50	4.00	30.00

	Each	10	100

6-7 feet, grafted, BR,			
two year top.....	2.00	14.00	

**JAMES H. VEITCH (Fugenzo)**—A variety which thrives in warm regions. Large double pink flowers blooming in spring. One of the best varieties.

2-3 feet, own roots, BR.....	.50	4.00	30.00
3-4 feet, own roots. BR.....	.75	6.00	50.00
4-5 feet, own roots, BR.....	1.00	8.00	
5-6 feet, own roots, BR.....	1.50	12.50	
6-8 feet, own roots, BD.....	2.00	17.50	

### **PRUNUS LANNESIANA (Oshima Sakura)**

Large single flowers, white tinted with pink, and fragrant. This variety produces numerous fruits about the size of blueberries. It has a good cherry flavor and makes fine jelly.

Price on this variety same as James H. Veitch.

B&B on these cherry trees 25c and 50c extra.

### **WEeping CHERRY**

We have a very limited supply of weeping cherry which were grafted 6 feet from the ground. It has a large head.

1 year graft with large head BR.....2.50 each

### **PRUNUS JAPONICA**

(Flowering Almonds)

Single flower with pleasant soft pink. Abundant fruit, shape and flavor of which are similar to commercial cherry fruit, but smaller in size.

18-24 inch, field grown

bushy, BR.....	.25	2.00

4-5 feet, B&B.....	2.50	

### CORTADERIA ARGENTEA (Pampas Grass)

Small division .....	.75	6.00
Medium division.....	1.25	10.00

## HEMEROCALLIS

(Day Lily)

### LEMON BEAUTY

One of our seedlings, single flower with long petals of beautiful pale yellow, blooms at mid-summer. We find this variety blooms longer than any other Hemerocallis.

Medium Division .....	3.50	25.00
-----------------------	------	-------

## H. SOVEREIGN

Dwarf single flower of clear light yellow, It blooms very early—March and April.

	Each	10	100
Medium division.....		2.50	15.00

## H. KWANSO

Large double orange copper flower produced on long stems.

Medium division .....	1.00	5.00
-----------------------	------	------

## IRIS KAEMPFERI (Japanese Iris)

Small division .....	1.00	7.00
----------------------	------	------

**Lilium Philippinense Formosanum**

## LILIUM PHILIPPINESE FORMOSANUM

Lily flowers and bulbs are very scarce today in this country on account of war. This is a great opportunity for fellow florists and nurserymen to raise good lily flowers and bulbs to fill this big demand. We have been experimenting with many varieties of lilies for many years and have found there is no lily or lilies so easy to grow and which blooms so early from seeds or small bulbs as this Formosa lily does.

This flower resembles the Easter Lily. It is large, trumpet-shaped and is pure white. It blooms from July to September outdoors.

We strongly recommend to our customers Philippine Formosanum lily, particularly our strain for the following reasons:

1. Flower: Its shape, color and other characteristics are of the highest quality from the commercial standpoint.

2. Blooms in summer after the Easter Lily and Regal Lily have disappeared, and when no lily of this type is on the market.

3. Early blooming nature from the seed as well as from small bulblets. No other variety of lily is known to parallel this Formosa lily.

4. Hardiness: It stands almost any kind of climate and roughest treatment. We have several beds of them which received practically no care since the seed came up, but we have gathered many thousands of beautiful flowers in the summer and many pounds of seed in the fall.

#### Price on Seed:

½ oz., \$1.00; 1 oz., \$1.50; ¼ lb., \$5.00; ½ lb., \$9.00; 1 lb., \$15.00.

#### Price on bulbs:

	Each	10	100

Small division .....	1.00	7.50
Medium division .....	1.25	10.00

#### RHODEA JAPONICA

A fine house plant which somewhat resembles the Sanseveria, but is more noble and artistic in appearance. It has dark green curled leaves and spikes of creamy white flowers followed by showy red berries. It is very hardy to cold weather, or it

can be planted in rock gardens where the climate is mild. It is adapted to dark, shady places. This is one of the rare plants of this country.

	Each	10	100
Seedling, 3-4 years old 3-4 leaves which are 6-10 inches long.....	.50	3.50	25.00
Division, 4 to 6 leaves which are 12 to 18 inches long .....	.75	5.00	35.00
